Our Spanish Programs

More than just a language course,
live Spanish every day.

Our Teaching Methodology

“

Immersive language learning is most effective when students are in direct contact with the local community.

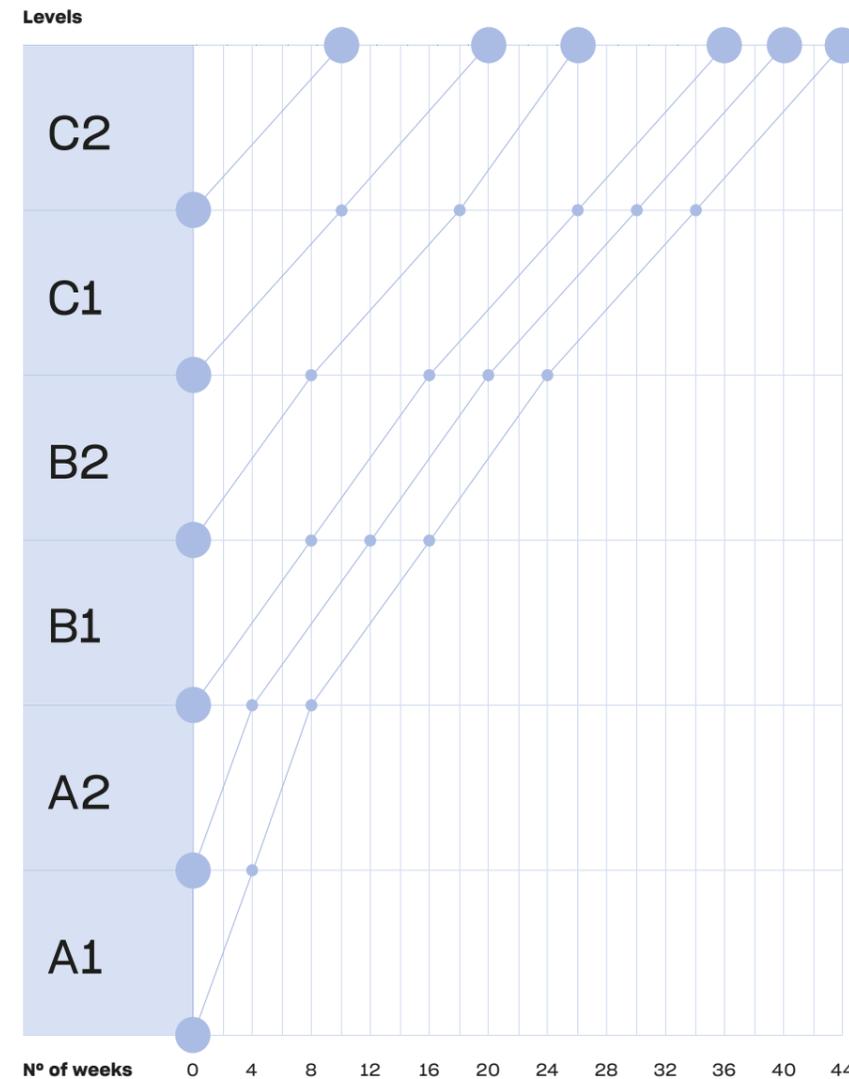

Our newest experiential learning experience, “Spanish in the City”, turns the city into an interactive classroom. With each activity, students learn about local history, culture and life while using the language in real life settings.

This innovative module fits within our wider teaching philosophy that the more you use a language, the more you learn it. We want our students to learn organically, using grammar and vocabulary while enjoying meaningful experiences in their chosen destination.”

Paula Cerdeira, Academic Director for Spanish
